Bringing Europe Closer to Young People â?? A

How does the European Union work? How many countries are members? What do Europeans have in common, and what makes each country unique? These were some of the questions explored by pupils at Primary School No. 1 in DzierÅ¼oniÃ³w during a European lesson organised in cooperation with Europe Direct Jelenia GÃ³ra.

The meeting was a chance to discover the European Union in a more engaging way than during a regular school lesson. Pupils learned more about EU member states, their cultures, traditions and diversity, as well as the values that bring Europeans together. There were interactive activities, interesting facts, discussions and plenty of learning through fun.

One of the highlights was discovering interesting language facts. Pupils learned a few phrases in Czech, which brought plenty of smiles and showed just how linguistically diverse Europe is.

The lesson at Primary School No. 1 marks the first joint activity as the City of DzierÅ¼oniÃ³w, promoted under the Invest in DzierÅ¼oniÃ³w brand, begins its cooperation with Europe Direct Jelenia GÃ³ra.

This cooperation opens the door to more educational activities that will help local residents, especially young people, learn more about Europe. Understanding the European Union, how it works, its cultural diversity and the opportunities it offers to young people is an important part of becoming informed and active members of society.

We would like to thank Europe Direct Jelenia GÃ³ra for this interesting meeting, and the pupils and teachers of Primary School No. 1 for their active participation.

This is just the beginning! We are already planning more joint activities for 2027.
