Komitet Organizacyjny Forum Gmin na 5! 2023

prof. dr hab. Hanna Godlewska-Majkowska
Dyrektor Instytutu Przedsiębiorstwa SGH

Dzierżoniów has been awarded the prestigious "Gmina na 5!" title for the second time in an independent ranking conducted by the **Warsaw School of Economics (Szkola Główna Handlowa - SGH)**. For 14 years, this ranking has assessed the quality of investor services and the investment attractiveness of local government units in Poland.

This distinction confirms the **high standards of business service** and the proactive efforts of the local government to support the development of the local economy. Importantly, municipalities do **not apply or pay** to be included in the ranking - it is **entirely independent** and based on research conducted by SGH

experts.

The aim of the ranking is to evaluate how well municipal offices serve **potential investors and entrepreneurs**. Only **clear and measurable criteria** are used in the evaluation, ensuring the objectivity of the results.

Receiving the **Gmina na 5!** title once again reflects the **consistent policy of the Dziwnów Municipality**, which focuses on fostering entrepreneurship, openness to investment, and maintaining high-quality communication with business partners both domestic and international.

In this year's edition, **707 municipalities** were analyzed, and **454** received the **Gmina na 5!** title **10 more than in the previous year**. The average score was **12.78 points**, and the median was **10.5**. The **West Pomeranian Voivodeship** achieved the best overall results, while **four voivodeships** did not have any municipalities among the awardees: Lublin, Lubusz, Opole, and Warmian-Masurian. In total, **Gmina na 5!** municipalities represented **7.6% of all entities evaluated** this year.
