Euro Pro Group from DzierÅ¼oniÃ³w is organizing a nationwide conference "Thermal Imaging in

We are proud to announce that Euro Pro Group from DzierÅ¼oniÃ³w, managed by Renata Gonet, is organizing the nationwide "Thermal Imaging in Practice" conference, which will take place on September 8-9, 2025.

Scientists, experts, practitioners, and representatives of the most prestigious companies and research institutes from across Poland will gather in one place. Discover the latest research projects and achievements in the field of thermal imaging applications in construction, energy, and maintenance, drone testing of photovoltaic panels and heating networks, and the latest solutions from FLIR using artificial intelligence.

This prestigious event, combining the worlds of science, technology, and business, will take place in two unique locations:

- KsiÄ Å¼ Castle in WaÅ?brzych
- International Conference Center in KrzyÅ¼owa

Who is it for?

The conference is aimed at a wide range of specialists:

- engineers and inspectors,
- HVAC and photovoltaic industry experts,
- drone operators,
- representatives of the industrial and energy sectors,
- scientists, and students interested in thermal imaging and its practical applications.

What's on the agenda?

Attendees can expect:

- lectures by experts from Poland and abroad,
- hands-on workshops and demonstrations of Flir equipment,
- a unique opportunity to visit the underground Geodynamic Laboratory of the Polish Academy of Sciences.

Special offers for participants:

- Second ticket 50% off
- PLN 300 net discount on thermal imaging training (valid for 36 months)

Don't wait â?? space is limited!

More information and the registration form can be found on the conference website.
