Young, Creative and Ready for the Challenge! The 2nd â??Entrepreneurial DzierÅ¼oniÃ³wâ?

Once again, DzierÅ¼oniÃ³w was transformed into a giant game board. Today, seventh-grade students from DzierÅ¼oniÃ³w proved that they can think outside the box, work together and find a solution to every challenge. The second edition of the â??Enterprising DzierÅ¼oniÃ³wâ? outdoor game delivered plenty of excitement, with the final results decided by mere seconds.

Students from seventh-grade classes at DzierÅ¼oniÃ³wâ??s primary schools took part in the competition. The participants faced a variety of challenges requiring not only economic knowledge, but also observation skills, quick decision-making and excellent teamwork. The game demonstrated that modern entrepreneurship is about much more than running a business â?? it is, above all, the ability to find unconventional solutions and take initiative.

The competition was extremely close, and the excitement continued right up to the finish line. When teams had the same number of points, their final positions were determined by the time they needed to complete the route.

Here are the winners of this yearâ??s edition:
