Businesses operating in the Lower Silesian Voivodeship can apply for funding to develop their employeesâ?? skills and access training and development services tailored to their business needs. Applications are currently being accepted under Measure 7.4.A of the European Funds for Lower Silesia (FEDS) programme, entitled *â??Grants for Development Services for Businesses in Lower Silesiaâ?* . The programme offers funding of up to 70% of the cost of selected development services.

The support covers development services that address the needs of businesses and their employees, in particular:

- Professional training courses;
- Postgraduate studies;
- Consulting services.

The project operates under a demand-driven model using the Development Services Database (*Baza UsÅ?ug Rozwojowych â?? BUR*). This means that businesses can independently select the services that best meet their identified needs and help develop their employeesâ?? skills and competencies.

Training courses and other development services are available through the Development Services Database.

Micro, small, medium-sized and large enterprises operating in the Lower Silesian Voivodeship are eligible to apply for funding.

Businesses located in DzierÅ¼oniÃ³w County, which is part of the WaÅ?brzych subregion, can obtain information about the application process and available support from the following programme operators:

- DolnoÅ?lÄ ska Agencja Rozwoju Regionalnego S.A. (Lower Silesian Regional Development Agency)

- DAWG â?? DolnoÅ?lÄ ska Agencja WspÃ³Å?pracy Gospodarczej (Lower Silesian Agency for Economic Cooperation)

- WrocÅ?awska Agencja Rozwoju Regionalnego S.A. (WrocÅ?aw Regional Development Agency)

Applications are accepted on an ongoing basis, and the operatorâ??s online system is available 24 hours a day, 7 days a week.

Application forms must be submitted electronically via the system available at: https://www.74a.uslugi-rozwojowe.pl

Funding under Measure 7.4.A of the FEDS programme provides an opportunity to enhance employeesâ?? qualifications, acquire new skills and better align the teamâ??s competencies with the needs of the business.
